

Naman Pandey

Data Scientist · AI Engineer · Technical Lead

London, UK | +44 7307 658109 | namanp95@gmail.com | [LinkedIn](#) | [GitHub](#) | Right to Work: UK & India (Unrestricted)

PROFESSIONAL SUMMARY

Data Scientist and AI Engineer with 9+ years of progressive experience across healthcare, industrial automation, and fintech. Proven record of orchestrating production-grade ML and GenAI systems, directing cross-functional teams, and translating complex technical strategy into measurable outcomes. Currently leading ML pipeline development at Blatchford Mobility and directing LLM evaluation programmes for frontier AI labs at Mercor. Seeking senior individual contributor or team lead roles in UK Tech and Data.

LEADERSHIP & CORE COMPETENCIES

Cross-functional Team Leadership · Technical Roadmap & Decision-Making · Stakeholder Management
End-to-End Project Delivery · LLM & AI Evaluation Frameworks · Healthcare Data Governance
Agile Delivery & CI/CD · Mentoring & Coaching · Technical Communication & Reporting

WORK EXPERIENCE

Data Scientist – R&D · Blatchford Mobility · United Kingdom Apr 2024 – Present

- Orchestrated end-to-end ML pipelines processing multimodal medical sensor data, delivering quantified gait analysis insights to support prosthetics R&D and clinical decision-making.
- Designed and validated models for Gait Phase Identification and abnormal gait detection; instituted Azure MLOps and GDPR-aligned data governance protocols for sensitive patient data.
- Advised on technical architecture across R&D, clinical, and engineering teams; coached junior data scientists, accelerating capability development and improving delivery quality.

Technical Project Manager · Mercor · United States (Remote) Aug 2025 – Present

Promoted to Technical Project Manager based on performance delivering machine learning engineering contracts.

- Directed evaluation and rubric-grading programmes for frontier AI labs; coordinated teams of data scientists, annotators, and stakeholders to consistently meet quality and scalability targets.
- Formulated LLM and multimodal evaluation frameworks now adopted across multiple client engagements; negotiated priorities with executive stakeholders to align delivery with commercial objectives.
- Initiated and led process improvement initiatives, streamlining AI evaluation pipelines through structured documentation and workflow redesign, reducing turnaround times significantly.

Process Analysis Engineer · Pressco Technology Inc. · United States May 2017 – Aug 2022

- Directed delivery of 50+ machine vision projects across food & beverage and pharmaceutical sectors; supervised cross-functional teams from scoping through to client handover.
- Designed and executed automated quality control systems using computer vision, substantially reducing manual inspection effort and defect escape rates in regulated manufacturing lines.
- Facilitated client-engineering communication, translating complex requirements into scalable vision solutions; maintained on-schedule delivery across concurrent project engagements.

Software Developer · Tata Consultancy Services · India Jul 2016 – May 2017

Engineered REST APIs for Finance and Insurance clients; implemented automated data validation pipelines eliminating 50% of manual processing effort.

Research Assistant – Conversational AI · Brunel University London · United Kingdom Jul – Aug 2023

Constructed and deployed GPT-3/LangChain chatbots for academic NLP research; contributed findings to department LLM evaluation methodology.

SELECTED PROJECTS

Dialogue Insights Generator · GenAI · NLP · GCP · Jan – Mar 2024

- Designed and deployed a production GenAI application transcribing multi-speaker conversations and generating psychological profiles via GPT-3.5; integrated speaker diarisation, sentiment analysis, and automated reporting with 99.9% uptime on GCP with Docker.

Brain Tumour Segmentation in 3D MRI · Computer Vision · PyTorch · Medical Imaging ·

Feb – Sep 2023

- Investigated and constructed novel UNet architectures (Attention, Swin Transformers, Multi-objective Loss) trained across 8 NVIDIA A6000 GPUs; surpassed benchmark Dice score and sensitivity by 4%+, contributing to published academic research.

EDUCATION

MSc Artificial Intelligence — Distinction	Brunel University London		2022 – 2023
BTech Computer Science — Merit	Birla Institute of Applied Sciences, India		2012 – 2016

TECHNICAL SKILLS

Machine Learning	PyTorch, TensorFlow, Scikit-learn, Keras, Neural Networks, Time Series Analysis
Generative AI	GPT-4/3.5, BERT, RAG, LangChain, TensorRT-LLM, vLLM, Llama, Vector DBs, Streamlit
NLP	Transformers, SpaCy, NLTK, Tokenisation, Embeddings, Sentiment Analysis
Computer Vision	OpenCV, Medical Imaging, UNet, Swin Transformers, Encoder-Decoder Architectures
MLOps & Cloud	Azure DevOps, GCP, Vertex AI, Docker, Kubernetes, CI/CD, Weights & Biases, Git
Data & Dev	Python, C++, SQL, R, NumPy, Pandas, FastAPI, Flask, REST APIs, Tableau, Power BI
Databases	PostgreSQL, MongoDB, MySQL, Vector DBs
